Experience

2023 - Till Date

The Meta Sum

Software Engineer

In my current role as a Software Engineer at The Meta Sum, I am responsible for overseeing a critical project in collaboration with the PGDP (Punjab Green Development Program). A project of the World Bank This project entails managing a multidisciplinary team, including mobile application and web developers, to deliver innovative solutions.

2022 - 2023

Punjab Information Technology Board (PITB)

Senior Software Engineer

During my tenure as a Senior Software Engineer at the Punjab Information Technology Board (PITB) from 2022 to 2023, I had the privilege of working on impactful projects in collaboration with esteemed clients. My role encompassed a range of responsibilities, including software development and enhancement, quality assurance, and client engagement.

- Project Collaboration with PAF (Pakistan Air Force): I played a crucial role in the development and implementation of software solutions for the Pakistan Air Force (PAF), specifically for the PMS (Personnel Management System) Project. This project involved designing and deploying a comprehensive system to manage personnel records efficiently.
- Audit System Development: I was instrumental in the development of an Audit System, which aimed to streamline and automate the auditing processes, ensuring accuracy and compliance with regulatory standards.
- Land Record System Enhancement: I contributed to the enhancement of the Land Record System, focusing on improving data accuracy, accessibility, and security. This system played a pivotal role in land management and record-keeping.
- Full-Stack Development: My responsibilities involved full-stack software development, encompassing front-end and back-end development, database management, and user interface design.

2015 - 2022

The Urban Unit

Software Engineer

As a Software Engineer at The Urban Unit from 2015 to 2022, I played a pivotal role in driving the success of numerous projects across various sectors, including excise & taxation and Punjab police. With a primary focus on full-stack development, I contributed significantly to project database management, software development, deployment, training, and the development of customized solutions for diverse clients.
